# Blood Test Results

The Blood Test Results Report lists the results of the client's Chemistry Screen and CBC and shows you whether or not an individual biomarker is outside of the optimal range and/or outside of the clinical lab range. The biomarkers are grouped into their most common categories.

Each biomarker in the Blood Test results report that is above or below the Optimal or Standard Range hyperlinks into our Out of Optimal Range report so you can read a description of the biomarker and some of the reasons why it may be high or low.

## Total number of biomarkers by optimal range

## BLOOD GLUCOSE

Glucose  
80.00 mg/dL

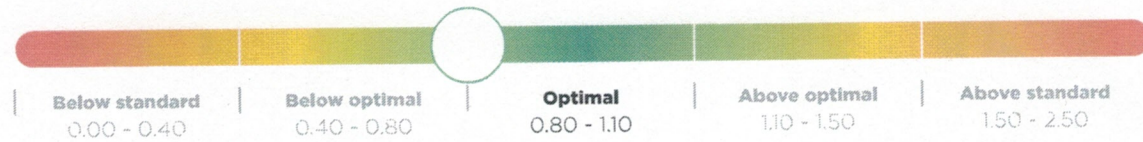

## RENAL

BUN  
10.00 mg/dL

Creatinine  
0.80 mg/dL

BUN/Creatinine Ratio  
12.50 Ratio
